Important Information

Risks

An investment in the Fund involves a high degree of risk, including the risk that the entire amount invested may be lost. The Fund is primarily designed to purchase certain investments, which will introduce significant risk to the Fund, including asset performance, price volatility, administrative risk and counterparty risk. No guarantee or representation is made that any Fund's investment program will be successful, or that such Fund's returns will exhibit low correlation with an investor's traditional securities portfolio.

The Fund may be deemed to be a speculative investment and is not intended as a complete investment program. Investment in the Fund is suitable only for persons who can bear the economic risk of the loss of their investment and who meet the conditions set forth in the Fund Documents. There can be no assurances that the Fund will achieve its investment objective. Prospective and existing Shareholders should carefully consider the risks involved in an investment in the Fund, including, but not limited to, those discussed in the Fund Documents. Prospective and existing Shareholders should consult their own legal, tax and financial advisors about the risks of an investment in the Fund. Any such risk could have a material adverse effect on the Fund and its Shareholders.

The return may increase or decrease as a result of currency fluctuations. The use of financial derivative instruments may result in increased gains or losses within the Fund.

Where an investor's own currency is different from the currency of the Fund, the return on investment may be affected by fluctuations in the currency exchange rate. The NAV of the Fund is calculated on a daily basis and published on the Fund's website at the following address: www.pgimfunds.com.

Call Risk: If an issuer exercises its right to redeem a security prior to its maturity (a call), the Fund may not recoup the full amount of its initial investment and may be forced to re-invest in lower-yielding securities, securities with greater credit risks or with other less favourable features.

Credit Risk: The value of debt securities may be adversely impacted by the erosion in the ability of the issuer to pay the amounts of interest and principal owed as they become due.

Currency Risk: The value of investments in the Fund that are designated in a currency other than the base currency for the Fund may rise and fall due to exchange rate fluctuations.

Emerging Market Risk: The Fund invests in emerging markets, which may experience political, market, social, regulatory, and/or economic instabilities. These instabilities may reduce the value of the Fund's investments.

Securitized Product Risk: Securitized products may be less liquid than other debt securities, may be prone to substantial price volatility and are subject to issuer repayment, counterparty and credit risk. Securitized products carry certain additional risks which may adversely impact the return on the securities, including: the possibility that distributions from collateral securities will not be adequate to make interest or other payments; the quality of the collateral may decline in value or default; and the possibility that the securitized products are subordinate to other classes.

Sovereign Debt Risk: Sovereign debt risk is the risk that the governmental entity that controls the repayment of sovereign debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt, due to factors related to its cash flow, its foreign reserves and political constraints, among others. If a governmental entity defaults, there may be few or no effective legal remedies for collecting on such debt.

Index Description

The Bloomberg Global Aggregate Index (USD Hedged) (the "Benchmark") provides a broad-based measure of the global investment-grade fixed income markets. The index includes Eurodollar and Euro-Yen corporate bonds, Canadian government, agency and corporate securities, and USD investment-grade 144A securities. Securities included in the index must have at least 1 year until final maturity and be rated investment-grade (Baa3/ BBB-/BBB-) or better using the middle rating of Moody's, S&P, and Fitch. BLOOMBERG® is a trademark and service mark of Bloomberg Finance L.P. and its affiliates (collectively "Bloomberg"). Bloomberg does not approve or endorse this material, or guarantees the accuracy or completeness of any information herein, or makes any warranty, express or implied, as to the results to be obtained therefrom and, to the maximum extent allowed by law, neither shall have any liability or responsibility for injury or damages arising in connection therewith.

In the event that the benchmark is no longer published, shareholders will be notified of a replacement index. Investors should note that the Fund does not intend to track the benchmark. While the Fund is actively managed, the benchmark will be used for risk management purposes (performing additional checks on holdings in the Fund with a weighting over or underweight the benchmark's holdings) and performance comparison purposes.

The use of benchmarks has limitations because portfolio holdings and characteristics of the Fund will differ from those of the benchmark, and such differences may be material. All indices and averages are unmanaged. You cannot make an investment directly in an index or average.

MORNINGSTAR INFORMATION

The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and

qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months.
